Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-9 and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by T Nomura et al. "A bitrate and bandwidth scalable celp coder"

As to claim 1, Numura teaches a wide band speech coder, comprising:

Means for splitting an input signal into narrow and wide band signals;

Down-sampling means for down-sampling, by a factor, the lower frequency signals and low-band of the signal;

Encoding means for encoding the down sampled signal; and

Multiplexing the two signals (Fig.1).

As to claim 2, the frequency divider in Nomura inherently consists a bandpass filter.

As to claims 4-9, the encoder in Nomura is a CELP and an LPC coder (Fig.2).

With respect to claims 16-20, the decoder for reproducing the signals encoded at the encoder is shown by Nomura (Fig.1) also the multipulse excitation code and gain generator are shown in fig.2.

Allowable Subject Matter

Claims 10-15 are allowed.

The following is an examiner's statement of reasons for allowance: the claims are allowed, because Nomura doesn't teach low pass filtering the lower sub band signal at the decoder as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed on 10/25/2005 have been fully considered but they are not persuasive.

According to Nomura the samples are down sampled by a factor where the factor could be $\frac{1}{2}$. It's clear that an integer larger than at the numerator as cited in the claim can result the half factor, therefore the examiner is not convinced this particular step is not inherently taught by Nomura as suggested and maintains his rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

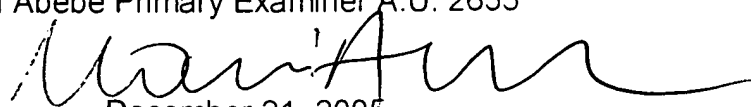

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
